

Rockfon® OneFrame

CREATE ACOUSTIC ZONES FOR OPEN SPACES AND
CORRIDORS WITH MODULAR SUSPENDED ISLANDS

Sounds Beautiful

Acoustic design for open spaces

You want to keep the ceiling exposed, improve acoustics, and define functional zones. Rockfon OneFrame is the solution.

Create suspended acoustic islands and framed corridor layouts that bring both structure and sound control to any open environment.

Works with most Rockfon modular tiles and grids — and configurable to any size you need.

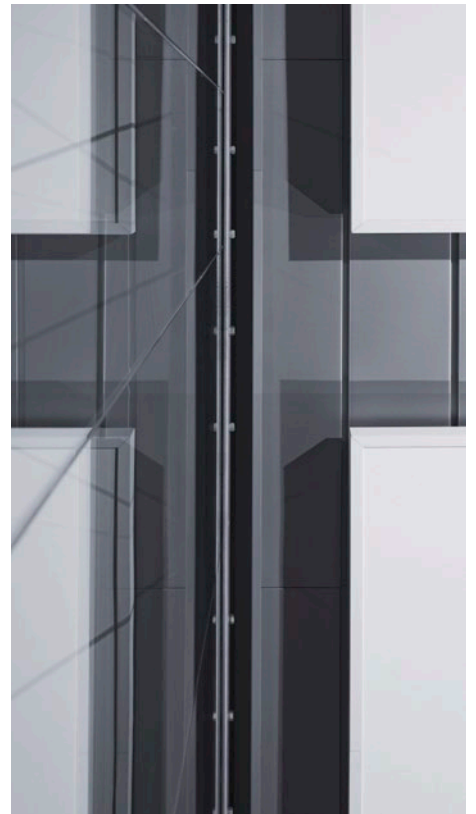

All the flexibility of a modular ceiling — reimagined as an acoustic island.

Why choose Rockfon OneFrame?

- Smart, flexible acoustic ceiling system
- Configurable size to suit any space
- Compatible with most Rockfon modular tiles: limitless design freedom with formats, edges, and colours
- Sleek 80 mm aluminium frame profile in matt black or matt white
- Flexible suspension heights from 10 cm to 1.5 m
- Pre-packed kits — no additional components no waste
- Hassle-free, fast installation

Project Copenhagen Airport, Denmark
Product Rockfon OneFrame & Rockfon Blanka X-edge
Dimensions 1800 x 600 mm
Grid Chicago Metallic T24 Click 2890

Simple to plan. Fast to install.

If you can install Rockfon tile and grid, you can install Rockfon OneFrame. Each kit is pre-cut and ready to go, with all the components included. The modular system increases speed, avoids waste, and ensures a clean finish every time. From box to ceiling with less effort and more confidence.

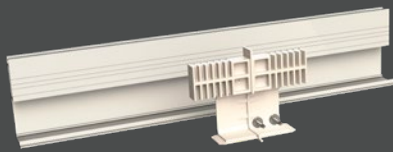

- Easy-to-adjust modular system
- Pre-cut kits with no profile waste
- Fewer measurements required
- Flexible suspension methods
